

# PULSE PRO: TRANSFORM SIMPLICITY INTO PROFITABILITY

## The most comprehensive fluid management system on the market

The Pulse fluid management system is designed specifically to address today's most pressing fluid management challenges. Pulse Pro is the most comprehensive, convenient, and easy-to-use fluid management system on the market.

### Only want basic control? Choose Pulse FC

Do you only want to restrict the quantity of fluid dispensed and ensure the correct fluid is dispensed? Then Pulse FC is your ideal solution. You only need the Pulse PC Software, Pulse Programmable Card and Pulse Dispense Meter. You simply program a card with a specific fluid type and quantity. When the technician scans the card on the dispense meter, the card will ensure that only the correct fluid is used and that the meter is preset for the correct amount of fluid. Dispenses only occur when the card has been authorized.

## Pulse Pro components: transform simplicity into profitability

Pulse Pro integrates seamlessly with ERP/DMS systems. You avoid excessive installation costs and delays, as there is no need to install extra software. Immediately access work orders and reporting tools on one platform.

1

### Pulse Hub

Wireless communication hub that communicates with all Pulse devices

2

### Pulse Software

User-friendly online software accessible via PC, tablet, or phone

3

### Pulse Dispense Meter

Ergonomic gun to correctly dispense one fluid

**OPTIONAL**

**4**

**Pulse Pump Air Controller**

Controller that shuts off air to the pump automatically when not in use

**OPTIONAL**

**5**

**Pulse Tank Level Monitor**

Ultrasonic sensor that records tank levels automatically

**OPTIONAL**

**6**

**Pulse (Remote) Extender**

Device that extends the reach of Pulse network throughout your facility

**OPTIONAL**

**7**

**Roll-Around**

Sturdy drum cart to transport containers to the dispense site easily

*Pulse is an innovative, efficient, and reliable system that I would recommend to all establishments. Here at the Metz site we are proud to be equipped with it.*

Giovanni Maggipinto, Workshop manager, Bernard Trucks Metz

**Good to know**

To facilitate fast and efficient oil dispenses, workshops often use mobile drum units of 200 liters. Pulse fluid management system offers a robust tracking solution for dispenses made from 200l mobile drum units.

## 6 reasons to switch to Pulse Pro right now

### Transparency

Monitor precisely what type of fluid is being used, where it's going, when it's dispensed, and who's performing the work.

### Accurate billing

Automatically assign every ounce of fluid directly to a work order to simplify billing and maximize profit margins.

### Simplicity

Avoid surprises, interruptions, and delays. Technicians can spend more time in the service bay – serving more customers.

### Accountability

Track issues to the source via advanced technology, including automated alerts and customizable reports.

### Inventory management

Monitor fluid inventory and schedule refills to minimize monthly reconciliation, delays, downtime, and excessive costs.

### Mobility

Easily pair with mobile dispense units and drums to reduce extra steps and hassle for technicians.

### PULSE® FLUID MANAGEMENT SYSTEM

## Drive profitability and optimize your workflows

Graco's Pulse Fluid Management System is specifically designed to drive profitability and increase efficiency in workshops. It makes fluid dispensing, tracking, and billing operations more efficient and streamlined.
